Bringing your envisioned idea into a live product ready for battle test within 90 Days*.

Automation in Action

Maximizing your operational manoeuvres to peak efficiency with full-fledged automation.

Data-Driven Approach

Improving your critical business metrics with reliable forecasting, reporting, and governance.

360° Ecosystem

Driving continuous innovation with unified software development and hardware engineering capabilities.

Why Choose Us

- 8.5* CSAT Score
- Fortune 500 Digital Customers
- 300+ Transformative Projects
- Flexible Engagement Models
- 20 Years of Service Delivery Excellence
- Proven, Scalable Frameworks
- 1000+ Skilled Tech Professionals
- Strong Business Ecosystem
- 30% Avg. Efficiency Boost
- Strict Adherence to Quality

Our Service Offerings

Digital Services

Accelerate your business performance with digital momentum that puts you at the forefront to deliver phenomenal customer experiences and meet market demands. Our vast digitalization and bespoke data solutions can help you efficiently transform your business operations and reimagine your offerings for improved value creation.

- Application Services
- Cloud Engineering
- Data, Analytics & AI
- Digital Infrastructure
- Salesforce Solutions
- Testing & Quality Assurance

Automotive & SDVs

Leverage our expertise in supporting automotive modernization for two long decades, helping global automakers and OEMs provide safer and more sophisticated commuting experiences. With our combined automotive technology and engineering solutions, you can boost innovation, meet reliability and safety benchmarks, and elevate your overall automotive lifecycle performance.

- In-vehicle Software Solutions
- AUTOSAR Solutions
- EV Solutions
- ADAS & Autonomous Vehicles
- Connected Vehicles
- Automotive Cybersecurity

Design to Manufacturing

Partner with the most comprehensive manufacturing outsourcing partner, covering the complete electronic and mechanical design and production spectrum. Our unified stack of embedded engineering and manufacturing infrastructure strengthens your value chain by fastening your product's market time, ensuring excellent reliability, and reducing operational overheads.

- Electronics
- Mechanical
- Electro-mechanicals
- Product Assembly
- Value Added Services

Industries We Transform

- Automotive
- Life Sciences & Healthcare
- Logistics & Transportation
- ISVs & Enterprises
- Consumer & Retail
- Education
